

Who says *dentists* aren't funny?

Well, to be honest, just about *everybody* says that.

But the fact is that each day in the dental office is filled with the comedy of everyday life. Dr. Larry Emmott brings thirty years of experience as a dentist and over fifteen years as a professional speaker to the platform, for an entertaining look at the business of dentistry.

Larry has been presenting to dental groups on technology for over 20 years. He has gained a reputation not only as a technology expert but also as a fun, humorous speaker who always has the audience laughing and wanting more. Now think about it...if a dentist can make computer technology fun, he must be a pretty entertaining speaker!

Invite Dr. Larry Emmott to present a fun-packed, humorous program at *YOUR* next meeting!

Don't just do the same old thing! Let Larry open the meeting or provide entertainment at the annual dinner. Give your session attendees a break and liven up a staff appreciation luncheon with the wit and humor of Dr. Larry Emmott!
