

THE HIGH TECH PAPERLESS OFFICE

Paperless Records | Digital Workflow | Online Services

A *paper* record system costs a dental practice > \$40,000/year.

Did you know...You *don't* have to convert old charts to digital?

Going paperless is *neither* time consuming nor expensive...

It is possible to create a completely paperless dental record and save the practice tens of thousands of dollars each year! In this entertaining presentation from Dr. Larry Emmott, the nation's leading high tech dentist, attendees learn how to convert to a paperless dental office, do it right the first time and save time and money.

Digital technology starts with paperless records but ultimately empowers a more efficient digital workflow utilizing online communication/e-services which are revolutionizing every aspect of the dental practice including how we communicate and make clinical decisions.

Program Features: Step by step guidance in setting up a paperless office, including the six essentials that must be in place before you get started, four ways to digitize ALL records (not just the paper chart), and understanding front deskless workflow. Learn what e-services are and how they can improve patient care and increase profitability, including specific examples of services dentist can start using immediately.

The presentation includes live program demonstrations. There will be something for both the beginner and the high tech power user all delivered in a fun and easy to understand style.

**THE FUTURE IS COMING
AND IT WILL BE AMAZING!**
